

Echara — Jira-Ready Product Development Plan (v1.0, MVP)

Goal: Deliver MVP across Buyer, Vendor, and Admin experiences for Echara (cross-platform + web).

MVP Duration: ~12 weeks total, across 4 major sprints.

AI Recommendations & Stripe Payments: deferred to Phase 2.

Admin: web-only.

EPIC 1 — Core Infrastructure & Setup

Objective: Establish the project skeleton, environments, and authentication foundation.

User Stories

ID	Story	Acceptance Criteria	Tech Notes	Priority
INF-1	As a developer, I can deploy base web and API projects so that all environments are accessible.	✔ Next.js buyer/vendor web and Node API deployed on Vercel dev env. ✔ Health check /ping route returns 200.	Init repo monorepo (Turborepo/PNPM). CI via Vercel previews.	 High
INF-2	As a developer, I can connect Firebase Auth and MongoDB Atlas.	✔ Sign-in/out works via Email. ✔ User doc created on first login.	Firebase SDK, Admin SDK on backend.	 High

I N F -	As a dev team, we can host realtime sockets.	✓ Socket server running on small Node instance. ✓ Client connects/disconnects successfully.	Express + Socket.IO; separate process.	🔥 H i g h
I N F -	As a dev, I can configure env management.	✓ .ENV files for dev/stage/prod documented. ✓ Secrets never committed.	Use Doppler/1Password share.	● M e d

🔗 EPIC 2 — Authentication & Profiles

Stories

ID	Story	Acceptance Criteria	Notes	Priority
A UT H- 1	As a user, I can sign up/sign in with Email, Google, or Apple.	✓ Works on mobile/web. ✓ JWT verified on server.	Firebase Auth.	🔥
A UT H- 2	As a user, I can edit my profile (name, avatar).	✓ Profile updates persist. ✓ Validation messages.	Upload avatar → Firebase Storage.	●
A UT H- 3	As a user, I can delete my account (GDPR).	✓ Data anonymised; confirmation modal.	Backend anonymisation script.	●

Dependencies: INF-2

EPIC 3 — Vendor Onboarding & Listings

Stories

ID	Story	Acceptance Criteria	Tech	Priority
VEN-1	As a vendor, I can complete onboarding and create my business profile.	✓ All required fields validated. ✓ Trial countdown visible. ✓ Status = pending.	Wizard UI, stepper flow.	
VEN-2	As admin, I can approve/reject vendor applications.	✓ Vendor status changes reflect instantly.	Admin portal endpoint /admin/vendors/:id/status.	
VEN-3	As a vendor, I can add/edit/delete listings.	✓ CRUD works. ✓ Upload gallery. ✓ Price & location required.	Formik + Firebase Storage.	
VEN-4	As a buyer, I can search listings with filters.	✓ Search returns correct paginated results. ✓ Empty states handled.	Geo query using \$near; category filter.	
VEN-5	As a buyer, I can view a listing detail page.	✓ Shows description, gallery, map, reviews.	SSR caching 30 s.	
VEN-6	As a buyer, I can save listings to wishlist.	✓ Toggle heart updates instantly.	Update users.favourites[].

Dependencies: AUTH, INF

EPIC 4 — Bookings & Calendar

ID	Story	Acceptance Criteria	Notes	Pri ori ty
BO OK -1	As a buyer, I can request a booking slot.	☒ Select date/time. ☒ Status = pending.	Date picker w/ vendor availability.	
BO OK -2	As a vendor, I can approve or decline booking.	☒ Booking status updates. ☒ Buyer notified.	PATCH /bookings/:id/approve.	
BO OK -3	As a vendor, I can sync my Google Calendar (read-only).	☒ OAuth success. ☒ Busy slots blocked.	Google API v3.	
BO OK -4	As a vendor, I can log payment info for a confirmed booking.	☒ Stores amount/method /date.	Form update booking doc.	
BO OK -5	As a buyer/vendor, I can cancel a booking.	☒ Status → canceled. ☒ Reason captured.	Soft delete pattern.	

Dependencies: VEN-3, AUTH

💬 EPIC 5 — Realtime Chat & Notifications

ID	Story	Acceptance Criteria	Notes	Priority
CHAT-1	As buyer/vendor, I can chat in real-time after an enquiry.	☒ Socket join works. ☒ Messages persist. ☒ Typing + seen indicators.	Socket.IO rooms.	🔥
CHAT-2	As a user, I can send images/files.	☒ Upload + preview. ☒ Max 10 MB. ☒ Push shown on device.	Firebase Storage.	🟡
NOTIF-1	As a user, I receive push notifications for chat & bookings.	☒ Badge counts update. ☒ Email template triggers.	FCM.	🔥
NOTIF-2	As a vendor, I get email alerts for new bookings.		SendGrid/Resend.	🟡

Dependencies: INF-3

★ EPIC 6 — Reviews & Ratings

ID	Story	Acceptance Criteria	Notes	Priority
REV-1	As a buyer, I can leave a review after a completed booking.	☒ Form validates; saves once.	One-review rule.	🔥
REV-2	As a vendor, I can reply to a review.	☒ Single editable reply. ☒ Timestamped.	PATCH /reviews/:id/reply	🟡
REV-3	As a buyer, I can see average ratings on vendor listing.	☒ Aggregates refresh instantly.	Mongo aggregation pipeline.	🔥

EPIC 7 — Vendor Insights Dashboard

ID	Story	Acceptance Criteria	Notes	Priority
D AS H- 1	As a vendor, I can see monthly & quarterly earnings.	☒ Graph displays totals.	Chart.js/Recharts.	
D AS H- 2	As a vendor, I can view bookings, cancellations, conversion rate.	☒ All KPIs visible. ☒ Filters by period.	Aggregations.	
D AS H- 3	As a vendor, I can view top listings & buyer demographics.	☒ Bar chart + pie chart.	Simplified dummy data allowed if limited stage data.	

EPIC 8 — Admin Portal (Web-Only)

ID	Story	Acceptance Criteria	Notes	Priority
AD MIN -1	As admin, I can log in with elevated role.	☒ Admin only access.	Firebase custom claim.	
AD MIN -2	As admin, I can approve/reject vendors & listings.	☒ Buttons update status.	/admin/vendors/:id/status.	
AD MIN -3	As admin, I can view dashboard analytics.	☒ Charts for users, bookings, ratings.	Chart.js.	
AD MIN -4	As admin, I can hide reviews/photos.	☒ Flag toggled + audit log.	hiddenByAdmin.	

AD MIN -5	As admin, I can view disputes & notes.	☒ Read-only chat snapshot. ☒ Add notes.	Simple tab view.	
-----------------	--	--	------------------	---

EPIC 9 — Subscription & Trial

ID	Story	Acceptance Criteria	Notes	Priority
SUB -1	As a vendor, I can see my free-trial countdown.	☒ Days left visible. ☒ Locked banner post-expiry.	trialEndDate calc.	
SUB -2	As admin, I can toggle a vendor's subscription manually.	☒ Status changes propagate.	Admin panel toggle.	
SUB -3	(Later) As vendor, I can pay £29/month via Stripe.	☐ Deferred Phase 2	—	—

EPIC 10 — QA, Security, & Release

ID	Story	Acceptance Criteria	Notes	Priority
Q A- 1	As a QA, I can run automated test suite.	☒ >80% core coverage. ☒ CI passes.	Jest + Playwright.	
S E C- 1	As admin, I can export basic audit logs.	☒ CSV download. ☒ Time-range filter.	Simple aggregation.	
R EL -1	As founder, I can view staging & prod builds.	☒ Vercel preview + TestFlight link shared.	Manual sign-off gates.	

Cross-Epic Dependencies (Summary)

Dependency	Dependent Epics
------------	-----------------

INF	All other epics
AUTH	Vendor Onboarding, Listings, Bookings, Chat
VEN	Bookings, Reviews, Dashboard
CHAT	Notifications, Admin
BOOK	Reviews
DASH	Admin (analytics)

Suggested Sprint Plan (Example)

Sprint	Focus	Major Deliverables
Sprint 1 (Weeks 1-3)	Infrastructure + Auth	INF, AUTH complete; base deploys live.
Sprint 2 (Weeks 4-6)	Vendor Onboarding + Listings + Search	VEN + LISTINGS MVP + Admin approval.
Sprint 3 (Weeks 7-9)	Bookings + Chat + Notifications	BOOK + CHAT flows end-to-end.
Sprint 4 (Weeks 10-12)	Reviews + Insights + Admin Analytics + Final QA	REV + DASH + ADMIN portal, release candidate.

Reporting & Workflow Guidelines

- **Branch naming:** feature/<epic>-<story>
- **Commit style:** Conventional commits (feat:, fix:, chore:)
- **Jira states:** Backlog → In Progress → Code Review → QA → Done
- **Definition of Done:**
 - All AC met
 - Unit tests pass
 - API documented in Swagger
 - Screens responsive
 - Accessibility check passed
 - No console errors
